

24-core flame-retardant fiber optic cable for smart buildings

Available in both multimode (OM3/OM4) and singlemode (OS2) variants, they ...

Available in both multimode (OM3/OM4) and singlemode (OS2) variants, they support configurations from 4 to 24 cores in a durable central loose tube design. Meeting stringent international standards, ...

Unitube Fire-Survival cables offer up to 24 fibers in a compact cable construction. Cables are specially designed to withstand the strict flammability tests of IEC 60331-25.

Ideal for heavy traffic or more challenging mechanical exposure conditions, this cable design consists of fibers organized into 12-fiber ribbons inside a central tube surrounded by dielectric strength members ...

Discover premium quality 24 core flame retardant fiber optic designed to enhance connectivity and performance. Ideal for business buyers seeking reliable solutions.

Durable indoor/outdoor plenum-rated cable with 2-24 tight-buffered fibers, aramid yarn reinforcement, and a flame-retardant PVC jacket. Ideal for backbone and horizontal installations ...

This cable design is available in both riser rated and plenum rated versions for deployment in any inside plant re-code application. The UV-resistant outer jacket, coupled with dry waterblocking technology, ...

This 24-core single-mode fiber optic cable is built for exceptional performance in outdoor environments. Its armored construction protects against mechanical damage, rodents, and harsh weather, while the ...

This innovative cable features a patented design that ensures functionality for over three hours in temperatures reaching 1000°C. It is halogen-free and flame-retardant, providing protection against ...

Loose tube gel-free riser cables are flame-retardant, indoor/outdoor, riser-rated cables designed for intrabuilding and intrabuilding backbones in aerial, duct and riser applications.

Ideal for heavy traffic or more challenging mechanical exposure conditions, this ...

Offered in OM1, OM3 and OM4 multimode and OS2 singlemode, in 4, 8, 12 or 24 core fibre configurations. All feature a central loose tube construction and internal/external LSZH (Low Smoke ...
