

Flexible Configuration: Customisable modules for access, metro, and long-haul network applications. Adva FSP 3000 is a scalable optical transport solution designed to efficiently deal with this new ...

Our FSP 3000 DCI OLS provides an open, compact and cost-efficient optical layer for both PAM4 and coherent wavelengths, including 400ZR. Coherent and PAM4 solutions share many OLS ...

Our FSP 3000 is a scalable optical transport solution designed to efficiently deal with this new environment, lowering its complexity and minimizing cost-per-bit and operational efforts.

Product Overview The FSP 3000 is a scalable WDM transport solution specifically designed for service providers and large enterprises looking for flexibility and cost-efficiency in multiplexing, transporting ...

This transport system offers solutions for Metro, Regional and Long Haul applications and supports all major protocols such as Ethernet, Fiber Channel, SDH, OTN and Video and data rates up to 8 Tbps ...

The FSP 3000 supports static and configurable photonic components, including tunable lasers and multi-degree ROADM technology for colorless and directionless wavelength routing.

Flexgrid reconfigurable optical add/drop modules (ROADM) from 1 to 32 degrees with multiple fixed, colorless, directionless and contentionless add/drop structures

The FSP 3000 facilitates bandwidth scale and service flexibility in access, backhaul, metro and long-haul networks, while supporting the creation of new revenue opportunities for high-speed OTN, Ethernet ...

operational efforts. With an open and modular design, our FSP 3000 supports a wide range of services and applications, from data center interconnect (DCI) to carrier-optimized infra.
