

From the CRU FOCI (CRU Optical Fiber and Cable Index survey), the optical fiber and cable market was at its lowest point in September-October 2023, and then recovered but at a slower ...

Join our Optical Fibre, Wire & Cable Community. Our long history of providing top quality data, insight, and intelligence to the key players in the global industry puts us in a prime position to facilitate a truly ...

By combining ultra-fast 5G speeds with advanced radio technology, operators can now deliver fiber-like performance -- without the limitations of physical cables. ? Key advantages: - Rapid...

Demand for fiber is expected to steadily grow over the next six years, with world optical cable consumption expected to grow by 3.9% when compared to a drop in 2023.

While many states have made significant progress on the BEAD funding approval process, CRU believes its impact on US cable demand will mainly materialize from 2025 onwards.

Let's explore five types of fiber optic cables that are poised to tackle the challenges confronting 5G networks, each offering unique solutions to propel us into the future.

CRU's Wire and Cable team has conducted an in-depth analysis of the global data centre market, which has experienced rapid growth in recent years across key regions, including #NorthAmerica,...

The interaction between sustained demand growth and limited upstream flexibility has reshaped the operating environment for optical fibre and cable markets. Price direction is now closely ...

Governments around the world have set ambitious targets for the rollout of superfast broadband and 5G infrastructure, both of which of course require vast quantities of fiber-optic cable ...

CRU's Wire and Cable team have recently dug deep into the data centre market around the world, which has seen rapid growth in recent years in major regions such as North America, ...

Let's explore five types of fiber optic cables that are poised to tackle the challenges confronting 5G networks, each offering unique solutions to propel ...
