

The SEL-4000 Relay Test System is designed for testing protective relays that have low-level test capabilities. The system consists of the SEL-AMS Adaptive Multichannel Source and either the SEL ...

It can test the functions and performance of integrated units, relay protection devices, measurement and control devices, and intelligent terminals. It is applicable to power plants, substations, various ...

Test Sets For Any Relay Protection Scheme. The F6895 option includes a GPS antenna/receiver with 100ft. cable. It is used with the F6885 GPS Receiver Interface to provide a GPS signal to the test ...

KPM relay testing equipment with high current rating, precision & advanced software. Ideal for distance, differential, df/dt & protection relay testing.

Verify that your protection relays operate correctly when faults occur. Megger's smart relay testing solutions and expert support help you validate protection performance, improve system ...

High precision and powerful 6-phase relay test set and commissioning tool; Power ...

Switchgear, or relay testers, are ideal for testing protection relay systems. Rent or purchase from ATEC and receive your product with immediate shipping.

Select from a number of protective relay tester models that feature varying power levels and complexity. Choose the best solution according to your testing and budgetary requirements.

Protection relay tester can be used to verify various relays and microcomputer protections, and can simulate a variety of complex transient, permanent, and conversion faults for the entire set of tests.

The CMC 356 is the universal six-phase testing solution for all generations and types of protection relays, where highest versatility, amplitude and power are required.

High precision and powerful 6-phase relay test set and commissioning tool; Power & Accuracy in one single PACKAGE, 6x35A, 4x310V analog outputs; The ever-expanding test library templates.
