

Discovery's Limiting InGaAs Optical Receiver is suited for single mode and multimode applications for 25G/40G from 850nm - 1550nm.

Digital 25G over short distance. We need here a 25G VCSEL laser driver and a 25G trans-impedance amplifier. Do you also have dual-channel version available? We would also be ...

Learn how to choose the right 25G optical transceivers for your network based on key factors such as performance, compatibility, and cost-effectiveness.

All Juniper 25G optics are compliant with key industry standards and specifications for seamless interoperability in multivendor environments and qualified for use across ACX, EX, MX, and QFX ...

GN7060 is a high sensitivity multi-rate burst mode transimpedance amplifier (TIA) that exceeds the sensitivity and response time requirements of next generation 25GS-PON and asymmetric HS-PON ...

25G OEO optical amplifier is a device for gaining optical signals in optical fiber links, which compensates the attenuation of optical signals during transmission, thereby increasing the non-relay transmission ...

This amplifier features programmable slice level adjust, LOS threshold and an average photodiode current monitor (RSSI). The MATA-37244 is available in a 3 mm x 2 mm die supplied in waffle packs, ...

1/10/25G FMT Series 1/10/25G FMT Series 10/100G M6200 Series EDFA Optical Amplifiers Fiber Monitoring AmpCon Management Software Chassis & Accessories

This OEO amplifier from HYD Technology is an excellent replacement for optical power amplifiers. It also resolves the problems of resources and loss of fiber in the transmission line. However, it helps ...
