

25G AOC's provides a cost effective solution for those same data center applications that require longer distance fixed length 1 to 10 meter interconnect using active optical Ethernet technology.

With their ability to support high-speed connectivity over longer distances, the 25G SFP28 Active Optical Cable is emerging as the go-to choice for organizations looking to enhance their network infrastructure.

The SFP28 25G LR transceiver is engineered to provide high-speed, long-reach optical connectivity in a compact and energy-efficient form factor. Its specifications are designed to meet the requirements of ...

Discover how LINK-PP 25G SFP28 optical modules enhance hyperscale data centers with high bandwidth, low latency, and energy efficiency. Learn key benefits and use cases.

The high speed 25 Gbps electrical interface is fully compliant with SFI specification of SFF 8431.

They have the characteristics of low power consumption, high speed and high reliability. These products are mainly applied in 25G Ethernet, CPRI10 and other environments.

Arista's 25G connectivity solutions include copper cables, Active Optical Cables (AOCs), and a range of optical transceivers in an SFP form factor for various fiber types and reach.

Featuring low power consumption, high speed, this 25G transceiver is ideal for 25G Ethernet, and data centre. Each SFP28 transceiver module is individually tested in targeted switch, it is fully compliant ...

The 25G SFP28 optical module is an optical module with a transmission rate of 25Gbps. It is a new Ethernet standard with many advantages, mainly used for the interconnection of data ...

Upgrade your network with our 25G SFP28 Active Optical Cable. Experience effortless plug-and-play speed, low latency, and energy efficiency for data centers.

Explore our full lineup of 25G optical transceivers--including SR, LR, and extended-reach variants--and request a sample today to experience seamless integration and unwavering reliability.
