

As a professional manufacturer of roll forming equipment, we take pride in introducing our state-of-the-art Cable Tray Bending Machine, designed to revolutionize your cable tray manufacturing process.

This is a cold bending forming machine specifically designed for cable trays, destined for Brazil. After a month of repeated communication with the Brazilian client, the design and technical parameters were ...

**Cold Bending Forming:** As the core component of cable tray forming machines, the cold bending assembly determines the final shape and dimensional accuracy of the tray. This assembly consists of ...

Upgrade production with an automated cable tray bending machine to save labor and boost productivity.

Our cable tray bending machine is designed to bend metal sheets with consistent accuracy and smooth edges, ensuring every finished cable tray meets strict quality standards.

Boost efficiency with the Comflor 100 Cold Bending Machine--designed for precise 100-1000mm cable tray production. Ideal for industrial projects, offering fast setup, energy savings, and long-term durability.

HOPEX cable tray bending manufacturing machine delivers fast setup, powerful bending force, and premium accuracy--perfect for modern cable tray production lines.

High precision cable tray bending machine with customizable stainless steel trays, ideal for wholesale purchases. Order as few as 1 unit, starting at \$1.5. Available in large volumes for resale and bulk ...

HOPEX Cable Tray Bending Machine offers high precision and energy-efficient performance, with an optimized drive system and intelligent power management. It minimizes energy consumption during ...

The cable tray roller forming machine is an efficient and automated equipment specially designed for cold bending metal coils (such as steel strips and aluminum strips) into cable trays (including tray ...
