

The VEGABAR 82 pressure transmitter can be used universally for the measurement of gases, vapours and liquids. Substances such as sand can be handled easily thanks to the abrasion-resistant ceramic ...

Michell's Advanced Ceramic Moisture Sensor is coupled with the latest microprocessor-based measurement circuitry to produce a fully calibrated and interchangeable transmitter. All calibration ...

Ceramic isolator flanges used in advanced experimental laboratories. Highly reliable feedthroughs are proven components in a range of industrial sectors. The combination of our materials and bonding ...

Use this Selection Guide to see the exact specifications for the various liner types, and get a quick overview of the best liners to use within different application areas.

Ceramic measuring gauges designed for dimensional stability and wear resistance. Ideal for high-precision industrial inspection and measurement systems.

CeramTec - customised solutions for measurement and sensor applications and manufacturing of components made from ceramic materials. With over 100 years of experience in technical ceramics ...

FLOW MEASUREMENT at the same time also the composition of flowing goods. Key r Kyocera provides ceramic components for different types of flow meters.

Find your flange measuring instrument easily amongst the 7 products from the leading brands (Normaco, Harrer & Kassen, Kabelmat Wickeltechnik, ...) on DirectIndustry, the industry specialist for ...

Different measuring systems can be installed on this type of gauge, such as dial gauges and manual control gauges. Gauges, centring gauges, RPS, pins and bushes, all these parts can be ...

SASA FLANGE is your reliable source for high-precision flanges used in instrumentation. Our solutions are trusted by engineers in oil & gas, power generation, water treatment, and chemical ...
