

Equipped with all-fiber ports, Aggregation Series Switches deliver up to 25 Gbps. With features such as Static Routing, DHCP Server, ACL, IGMP Snooping, STP, LAG, and centralized cloud management, ...

Configuring port aggregation on a UniFi switch is straightforward using the UniFi Network Controller (or UniFi OS Console). The process involves selecting the ports you wish to combine, ...

An Aggregation or "Top-of-Rack" switch is designed to connect everything in a rack at high speeds, then have an even bigger pipe out to the rest of the network. The Pro Aggregation does this with it's ...

Developed for long distance fiber installations. Equipped with eight SFP+ ports, two additional SFP28 ports and one RJ45 console port for configuration. With AXIS D8308 Fiber Aggregation Switch you ...

To allow port aggregation, the basic configuration on all the ports must be consistent. The following list details the basic configuration parameters that should be consistent on all the ports: STP ...

Faster replacement and priority support, covered for 5 years. High-performance 10G SFP modules for optimal connectivity. An 8-port, Layer 2 switch made for 10G SFP+ connections.

Designed for convenient management, the UniFi Controller software allows admins to configure and monitor the UniFi Switch and other UniFi devices using a graphical user interface.

In what order should I configure port aggregation on my switches? You should be certain that configuration changes are first done on the most downstream switch, and then move upstream ...

Discover the role of aggregation switches. Explore differences between aggregation, access, and core switches, and choose the right model for your network.
