

We create Prefabricated Micro Data Center to build foundation of digital future. Within one day, you can deploy the IT equipments and power on your business. Pre-manufactured and fully tested means ...

With our Edge Center solutions, we ensure quick deployment of prefabricated data centers that are compact, fast, efficient, and reliable. These data centers come in ...

Flexible rack space options from 1U to full cabinets with enterprise-grade infrastructure and cooling. Private, lockable cabinets with customizable power and cooling configurations for your equipment. ...

Traditional data centers take years to build on-site and carry significant construction risk. Modular data centers are built in controlled factory conditions, fully tested before shipment, and deploy in months, ...

Prefabricated modular data centers are an excellent solution for Havana, where traditional construction can be challenging due to the urban density and historical preservation.

It's unlikely that Google actually built a data center in Cuba to do this. The company leases colocation space for its edge nodes, and its Cuba node is likely to be hosted in an ETECSA ...

Make the most of our decades of experience in managing remote locations globally and designing extensive outdoor enclosure offerings, which not only protect your vital electronic equipment from ...

With our Edge Center solutions, we ensure quick deployment of prefabricated data centers that are compact, fast, efficient, and reliable. These data centers come in an all-in-one box that delivers ...

Prefabricated, pretested, and fully configured architecture with high portability for edge computing application. All subsystems, such as UPS, power distribution, battery, cooling, racks and more, are ...

Reduce the risk of data leaks and interference by using a private connection that guarantees the confidentiality of your information. Different submarine cable systems and terrestrial routes are ...

Outdoor and containerised data centres that can be placed anywhere - process data right where it's needed, reducing latency and increasing flexibility.
