

A coolant distribution unit (CDU) is an HVAC cooling solution for data centers. The CDU moves liquid coolant through the system so the equipment doesn't overheat and can run safely and efficiently.

This white box integrates smoothly into existing air conditioning systems, facilitating balanced cooling without the complication of ductwork. Ideal for owners seeking an efficient air ...

Johnson Controls new Series Fan Powered Variable Air Volume terminals with sensible cooling are available from 100 to 2000 cfm, offering tremendous flexibility ...

FF-018 Electrical Power Distribution Box Enclosure Cooling Fans Very low noise Minimal depth in enclosure Functional design Time-saving installation Weather proof and UV resistant

As a device for distributing electric energy, the distribution box usually generates a certain amount of heat, which needs to be dissipated to ensure its normal operation and prolong its service life. The ...

Learn how to properly install Krueger's DFL linear slot diffuser for a mud-in application (Frame BB). See the differences between airflow patterns after adjusting blade positioning (entrained jets vs free jets). ...

Variable air volume boxes are a key component of our MicroTech®; Integrated system for VAV system applications, providing consistent and reliable comfort for building occupants.

A single zone system consists of an air-handling unit, a heat source, cooling source, distribution ductwork, and appropriate delivery devices. The figure below is a general arrangement of a single ...

The Air Conditioning Distribution Box is a critical electrical component that centralizes power distribution for cooling systems while providing protection and ease of maintenance.

These compact units enable seamless integration of power sources while protecting your equipment with circuit breakers and safety features. Below is a summary table featuring top mini split ...

Enclosure Coolers keep Electrical and Electronic Enclosures cool, clean and protected and are a low-cost alternative to expensive, high-maintenance air conditioners; and avoid contamination with dirty, ...

SuperAir adjustable Top Entry Distribution Box is a vital part of HVAC systems, designed to control air distribution through ducts for both commercial and residential applications.
