

A guide to understanding distribution testing: why it exists, how ASTM D4169 and ISTA work, what machines simulate, and how retailer/carrier specs fit.

ASTM's shipping and distribution standards are designed to simulate these real-world hazards in a controlled laboratory setting to ensure packaging systems provide adequate protection. A ...

Our engineers can design custom test protocols based on your product, packaging type, and distribution environment. We also offer consulting for packaging optimization, damage reduction, and regulatory ...
