

Whether you are building new fiber infrastructure, upgrading legacy systems, or performing emergency restoration, our fusion splicing equipment delivers consistent arc calibration, fast splice cycles, and ...

Leviton offers a full range of fusion fiber splicing solutions, including fiber splice modules in our popular HDX and SDX fiber optic patching footprints, and new FASTSPlice Splice-On Fiber Connectors in ...

With their compact and uniform design, the splice boxes for both the DIN rail and 19" mounting provide ample interior space for the secure connection of fiber optics.

This 72 core inline fiber splice closure can be used as fiber optic distribution box that designed for optical splitting, fiber splicing, cable joint, termination and distribution.

Unlike the single-core boxes, this fusion splicer box is built for splicing multiple-core fiber optic cables concurrently. This capability enables high-speed data transmission through a single cable, making it ...

Highlights Fusion splicers are essential for creating low-loss, high-performance fiber optic connections in telecom, FTTH, and data center applications. The best splicers offer core alignment, ...

Our fiber optic splice trays and boxes provide a secure and organized solution for managing fiber splices in various network environments. These enclosures protect delicate spliced fibers, ensuring long ...

They are designed to provide a transition point between high-fiber count outside plant (OSP) and inside plant (ISP) cables as well as a distribution point for distributing a single high-fiber count cable to be ...

Explore fusion splicers compatible with single-mode, multi-mode, and specialty fibers. Get machines with rapid splicing and integrated diagnostic tools.

The FSP200 touchscreen optical fusion splicer uses core alignment technology, which allows the technician to reliably fuse fiber optic cables with low splice losses in as little time as seven seconds.
