

The FI-7000 FiberInspector Pro is a fiber optic inspection scope that allows you to inspect and certify fiber optic connector end-faces in 1 ...

This portable inspector can check the end face of pigtail and patch cord, and also capable of inspecting the connector end face through adapter which is already mounted on the patch panel, wall box ...

The VIAVI fiber optic inspection tools allow you to quickly and accurately determine the cleanliness of fiber connections when installing new networks.

When a fiber optic system is successfully tested and determined to meet the customer's specific requirements and relevant industry standards, the system performance and individual links ...

Inspection and cleaning of fiber optic end faces have been best practices for some time, yet contaminated connections remain the number one cause of fiber-related problems and test failures ...

First step is to make an accurate inspection of the ferrule, using a video microscope. Simply connect the fiber optic connector to the microscope probe and the test will be done automatically. Each type of ...

Use this fiber optic cabinet inspection checklist to audit network enclosures and field cabinets. Capture cabinet identifiers and location, note bulkhead and tray setup, confirm pigtail and distribution fiber ...

AFL Fiber Inspection Products enable network technicians and other personnel to safely inspect fiber endfaces for contamination and verify the effectiveness of fiber cleaning procedures.

Fiber Testing Reports and Documentation. Accurate reporting is vital in fiberoptic testing. It ensures installations are verified, faults are documented, and results are traceable -- not only for ...

The Fiber Chek Software uses an algorithmic process to automatically analyze the fiber optic end-face based on Glenair's pass/fail criteria. This analysis provides a "Pass" or "Fail" result, thus removing ...

When conducting pigtail or end to end span tests, the Contractor must use the proper index of refraction according to the type of fiber being tested. Use the following chart as a reference:

In just a few seconds, a full connector certification test is performed and a test report is generated. All this at the touch of a button, no training required.
