

FITEL splicers are simple yet precise and reliable tools that can support a full range of fiber manufacturing, R& D, installation, and maintenance applications. Fusion splicing permanently joins ...

Splicing involves joining two materials--wires, fibers, or component reels--using specialized tapes to create a secure, functional connection. In high-stakes settings, such as SMT ...

Fusion splicers are essential for creating low-loss, high-performance fiber optic connections in telecom, FTTH, and data center applications. The best splicers offer core alignment, ...

Fiber Instrument Sales has a wide variety of fiber optic splicing equipment such as fusion splicers from AFL, Sumitomo, FITEL, and FIS. FIS also splicing tools and accessories such as cleavers, thermal ...

Fiber Optic Center has fiber optic splicing equipment, including splicers, cleavers, protection sleeves, mechanical splicing tools and more. We distribute fiber optic splicing equipment from Corning, AFL, ...

SMT Reel Tape Splicing Machine automatically splices a new SMD reel tape to the existing reel tape. With this machine, you don't need to stop your SMT production line when you are going to ...

Designed for telecom professionals, FTTH installers, and network engineers, this machine delivers ultra-fast splicing speeds ( $\leq 6$  seconds) and low loss rates, ensuring reliable connections in any environment.

Browse professional-grade fiber optic splicers with compact designs and durable construction. Shop models suitable for field installations and repairs.

The powerful FITEL S124X Hand-Held Ribbon Fusion Splicer delivers fast and reliable optical splicing for 200  $\mu$ m 16-fiber pitched ribbons even under rigorous environmental conditions.

It is not easy to maintain splicing quality when continuously splicing a huge number of tape reels. Splicing with low work quality causes short stops and becomes a factor in lowering productivity. The ...
