

Fiber Optic Wavelength Division Multiplexer Products

Wavelength division multiplexers (WDM) are electronic devices that combine light signals with different wavelengths, coming from different fibers, onto a single fiber. They are a cost effective method to ...

Each channel can be linked via fiber with selected FiberPlex FOM, FOI or TD Series fiber modules, FiberPlex LightViper(TM) or with virtually any third party fiber optic equipment with data rates from 155 ...

Dense WDM (DWDMs) provide the ability to expand fiber capacity by allowing you to combine or separate multiple wavelength on a single fiber.

FIBERONE® offers a complete line of wavelength division multiplexers, including WDM, CWDM, and DWDM modules. These wavelength division multiplexers enable fiber optic networks to mux or ...

Wavelength Division Multiplexers offered in 5 different series to meet customer density and performance requirements. [View WDM Solutions](#)

We produce fiber-coupled Wavelength-Division Multiplexing (WDM) devices that combine (Mux) or separate (DeMux) multiple wavelength channels into or from a ...

Wavelength Division Multiplexers (WDM) by AFL include CWDM LGX, Thin film filter CWDM, single channel OADM, DWDM LGX, Optical FTTx channel and RFOG wavelength division modules.

Explore wavelength division multiplexers (WDM), their applications, and products and learn why Corning is the best choice for WDM.

Use of a WDM will replace the need to add more fiber cable in the network, reducing overall upgrade costs. Clearfield's design experts can consult with you on your wavelength division multiplexer needs ...

We produce fiber-coupled Wavelength-Division Multiplexing (WDM) devices that combine (Mux) or separate (DeMux) multiple wavelength channels into or from a single optical fiber.

Fiber mux solutions from Maxcom combine multiple wavelengths over a single fiber to increase capacity. DWDM multiplexers available in 8, 16, and 40 channel options.
