Fiber Optic Cable Reels can be made in custom colors, though the reels come standard in black for commercial use and desert tan or carc green for military use. Get the right tools for the job!

Do not store the cable reel on its side against one of the flanges, overtime the fiber cable will loosen on the reel much the same as incorrect rolling direction.

To help keep the cable snug on the drum during respooling, staple an open cable tie near the start hole and then use it to secure the cable (Figure 7, inset).
