

How to remove copper from optical fiber cables

Learn how to safely and accurately cut fiber optic cables using the right tools and techniques for optimal performance.

After preparing the cable, you can use a fusion splicer to join the fiber ends, ensuring a precise connection that will maintain data integrity. Consider troubleshooting tips if difficulties arise ...

We provide fiber optic stripping tools for fiber coating removal, including end-stripping and mid-span tools, ideal for stripping hard to remove coatings.

Learn how to repair a damaged or cut fiber optic cable with step-by-step instructions, essential tools, and best practices. Restore your fiber cable quickly and ensure stable, low-loss network performance.

Fiber Cable Stripping Tools: A Comprehensive Guide The delicate nature of fiber optic cables requires specialized tools for proper handling, especially when it comes to stripping away the protective layers ...

How to remove copper or fiber optic cable sheath and ring cut with Jonard's JIC-4366?

Achieve clean, damage-free strips every time with our professional Fiber Optic Cable Strippers and Wire Stripping Pliers. Featuring high-precision blades for removing 250µm coatings, 900µm buffers, and ...

Learn how to use fiber strippers, cable cutting scissors, and armored cable slitters. Discover their applications in fiber splicing, cable prep, and FTTH.

The Jonard JIC-4366 cable sheath stripper and ring tool is ideal for copper cables, tight buffer optical fiber cables, and for slitting figure 8 or webbed cables.

Fiber strippers are precision tools that remove a coating from a fiber before connectorization or splicing. There are mechanical, thermal and non-contact strippers.
