

The most basic form of a hot aisle/cold aisle setup consists of server racks placed alternatively with cold or hot air sources placed in between. The arrangement is such that cold air intake is facing one way, ...

Instalasi Cold Aisle Containment untuk Direktorat Jenderal Pajak Kementerian Keuangan Republik Indonesia. Hubungi kami untuk kebutuhan proyek khusus, konsultasikan spesifikasi Anda dengan ...

This modular aisle containment solution allows for flexible deployment, with components like roof panels that open in case of fire, ensuring safety while maintaining high cooling efficiency.

Enables the isolation of hot and cold aisles, thereby maximizing cooling system efficiency and minimizing cooling energy requirements. Highly modular, scalable, expandable, and retrofittable, ...

The Indonesian market for Cold Aisle Containment (CAC) Systems is positioned at a critical inflection point, transitioning from a niche solution for hyperscale operators to a mainstream ...

Smart Aisle Containment Data Center 600mm View Details

By isolating hot and cold airflows, our innovative containment systems optimise cooling efficiency, reducing energy consumption, and improving server performance.

PT Grahasumber Prima Elektronik (GSPE) presents a row-based containment solution designed with modularity to physically separate cold and hot airflow. The primary principle of aisle ...

This Cold Aisle containment solution is deployed horizontally across the aisles to create a tight containment barrier. The panels are made of an steel frame with a special translucent insert.

We are a local manufacturer that focuses on aisle containment and data center cage products. We are experienced and have installed our products in several Tier III and Tier IV data centers in Indonesia.
