

Industrial Ethernet switches are high-reliability and cost-effective network devices designed to be applied in harsh industrial environments where they are likely to ...

Extreme Industrial Switches are a family of ruggedized Layer 2 switches designed to operate under harsh environments and extended temperature conditions. They provide continuous uptime, ...

FS Industrial Ethernet Switches with robust design for harsh industrial and outdoor environments subject to vibrations, shocks and extreme temperature fluctuations from -40° to 75° generally.

Moxa provides a wide range of industrial Ethernet switches that feature industrial-grade reliability, network redundancy, strengthened security, easy management, and competitive price-to ...

Industrial Ethernet switches are high-reliability and cost-effective network devices designed to be applied in harsh industrial environments where they are likely to be subject to shocks, vibration and extreme ...

The DIS switches are designed to easily handle hot and cold temperature variances,* and can cold start at their coldest temperatures. With superior environmental protections to commercial switches, these ...

Commercial grade switches feature a galvanized steel strap, are available in Decora style, and go up to 20 Amp. The ideal solution for demanding applications requiring robust construction and exceptional ...

Built to endure the demanding conditions of factories, transportation infrastructure, grid substations, and other harsh environments, Cisco Industrial Ethernet switches come in a wide range of form factors to ...

Our switches are built for high network flexibility, cyber security and durability and are suitable for use in mission-critical environments.

Antaira offers a variety of industrial Ethernet switches, including industrial-grade network switches, DIN mount switches, and Ethernet switchboards, that can perform efficiently in adverse weather ...

Industrial-grade Ethernet Switches are specifically designed to connect devices in network environments that are subject to extreme operating temperatures of -40°C to 75°C, vibrations, and shocks.
