

Learn how to design IP68-rated power supplies for autonomous marine robots. Covers waterproofing, potting, connectors, and certification

Full custom development case study of a waterproof AC/DC Power Adapter. We develop power supplies tailored to customer-specific requirements through an integrated approach covering enclosure ...

The integrated Core Independent Peripherals (CIPs) provide signal generation, custom logic and signal conditioning to augment analog power supply designs, providing on/off control, soft start, power ...

With expertise spanning AC-DC and DC-DC power supplies, IPD delivers robust products designed to meet the stringent requirements of medical, industrial, and Audio Video applications.

These kits accelerate project development timelines by enabling the developer to evaluate, modify, tune, and test a existing, proven design. The kits provide the ...

These kits accelerate project development timelines by enabling the developer to evaluate, modify, tune, and test a existing, proven design. The kits provide the essential materials to get started on your next ...

Integrated Power Designs products are designed, assembled and sold from our Wilkes-Barre, Pa facility.

In recent years, Integrated Power Designs has expanded its range of power supplies from 25W to 300W utilizing the most advanced manufacturing techniques. All of IPD's products are designed and ...

This reduction is being achieved by constantly improving power supply efficiencies. IPD designs their products to meet 90% peak efficiency and these compact, efficient solutions are ideal for ITE, ...

The paper also details how treating integrated devices as power supply modules instead of co-packaged components significantly improves the system performance and long-term reliability, and reduces the ...

Our Waterproof Power Supplies and Waterproof Sealed Power Supplies have a mechanical design that provides outstanding thermal management without airflow and will meet drop, shock and vibration ...
