

CHINT provide one-stop Intelligent Power Distribution Solutions solutions. From consulting services to engineering design and construction, to long-term project maintenance, CHINT is willing to work with ...

The intelligent distribution electrical box as is a new type of terminal designed and developed by our electric power equipment company in response to the State Grid's comprehensive promotion of the ...

Our intelligent and mechanical boxes in the area of power and data distribution offer modular solutions for all voltage levels and at the same time optimize functionality - for maximum efficiency with ...

Digital technologies such as Cloud Computing, Big Data, Internet of Things (IoT), Artificial Intelligence (AI) and Industry 4.0 are phenomenon which are changing the world we are living in. Those ...

In view of the problem that the door of the low-voltage power distribution box is opened for no reason under the premise that the intelligent terminal has been

Compared with the traditional power distribution box, it is safer to cut off the strong power supply remotely, and it can save energy through the timing mode while controlling the equipments ...

As a leading electrical equipment manufacturer, Yimuda Technology Company has launched a new generation of intelligent distribution box series products, providing reliable and energy-saving power ...

Traditional electrical distribution boxes mainly function to distribute electrical energy and protect circuits. Smart electrical distribution boxes, on the other hand, incorporate intelligent ...

As an indispensable power control device in modern buildings and industrial facilities, the distribution box integrates core components (e.g., circuit breakers, contactors, intelligent protection ...

The present invention provides an intelligent distribution box and a signal transmission method.
