

# Large-span fireproof cable trays for high-voltage electrical cables

Boost your electrical needs with our Fire Rated Cable Trays that are tested for fire resistance under real-world conditions. Designed to perform even with cables installed and connected.

These trays can accommodate a large number of branch lines and ...

Our 4-hour fire rated cable encasements provide comprehensive fire and blast protection, shielding cables from fire and containing high voltage cable fires

Meka Pro's more than 1200 fire-tested standard products enable always excellent, cost-effective and fire-resistant installation. Guarantee, that electricity supply will work even during a fire, in which case ...

These trays can accommodate a large number of branch lines and have high load-bearing capacity. The cable trays have great mechanical strength and require minimal maintenance.

SILTEC cable trays, heavy duty type, feature a reinforced construction with zigzag wires down the sides and double wires on the sides and at the bottom, providing these trays with a very high load capacity.

Different from normal cable trays, Large span cable tray has large supporting span with high loading capacities. Large span cable tray is assembled by pultruded FRP profiles.

Unifrax's FyreWrap® Cable Insulation is a thin, flexible, insulation wrap designed to provide a fire-protective enclosure around cable trays and conduit.

Shop high-quality fire proof cable trays for industrial and commercial use. Durable, powder-coated, and perforated for optimal ventilation and safety.

Long span fireproof cable tray can span longer distances, generally spanning up to 6 meters and up to 13 meters, which makes them very suitable for use in large factories, tunnels and other occasions.

Engineered for long distance cable routing, long-span cable tray offers high load capacity and strong structural durability for industrial applications.
