

Low-loss installation solution for German fiber optic heat shrink tubing

Consist of cross linked polyolefin, Hot fusion tubing and Stainless Reinforcing Steel Rod which keep optic transmission properties of optical fiber and enhance the protection to optical fiber splices.

3M Heat Shrink Tubing and Devices provide an easy solution for insulating and protecting wire, cables, connections and components. These field-proven products are known for ease of use and durability, ...

Heat shrinkable fibre optic splice protectors are available in 10 variants/sizes. The differences lie in the length of the splice protector, the diameter of the tubing, and the length of the steel guide rod inside ...

The COMPAQ CFOT Series is a medium-wall heat shrinkable tubing designed specifically for fibre optic splice closures in telecom, broadband, and data network applications.

Our range of heat shrink tubing is 100% certified and available as German or European goods. We have the right heat shrink tubing for every application and offer 100% reliable performance parameters.

Our products offer excellent protection and are easy to install, making them the ideal choice for a wide range of industries and applications. Whether for mechanical stability, moisture protection, or ...

We deliver innovative, secure, and future-ready infrastructure for modern businesses.

Depending on the application, we provide shrink tubing made from various plastics and with special properties, such as halogen-free, adhesive-coated, transparent, colored, high-temperature resistant, ...

Protect the fibre melting points: the transparent sleeve makes it easier to detect splicing from shrinking. The fiber heat shrink tubing is tight and the metal carrier maintains its strength to prevent the fiber on ...

Our heat-shrink tubing is available in different versions and also with international approvals and specifications, e.g. MIL or UL approval. They are especially suitable for the requirements of the ...
