

Multi-wavelength light source calibration in Malta

For lamp-based testing applications, we offer calibration light sources designed for the optical calibration of spectroradiometers, photometers, and radiometers. Our solutions serve as precision standards for ...

StellarNet provides a full range of calibration light sources and calibration services for its line of miniature spectrometer hardware that are traceable to the National Institute of Standards ...

Start your request today to have one of our calibration specialists perform a fiber optic or light calibration, repair, or validation service. Equipment used to measure physical dimensions using ...

Our in-House calibration / Metrology services are performed at our dedicated calibration laboratory, using permanently-installed test equipment that is continually monitored for accuracy and ...

HighFinesse offers a variety of frequency stabilized, narrow linewidth laser sources for the calibration of all wavelength meters and applications down to ± 0.5 MHz absolute accuracy.

This is a list that shows the accredited Calibration laboratories with National Accreditation Body of Malta.

The highly collimated multi-wavelength output beam is suitable for working with lenses, filters, dichroic, mirrors, and many other optical components, while simultaneously allowing the user to tailor the ...

The lab carries out calibration on the full range of laboratory and industrial weighing systems on site and at customers. The lab has 30 Tonnes of calibrated, traceable mass standards.

Ensure accurate spectrometer calibration with our gas-discharge sources. Choose from mercury, krypton, neon, argon & xenon light sources. Contact us today!

Wavelength calibration makes sure every spectral line matches the correct wavelength, laying the groundwork for accurate analysis. Scientists pick from various calibration methods based ...
