

New product Infrared light integrated optical power meter

New to the market are OptoSigma's high-speed power meters. Based on a unique high-speed thermal sensor, these power and energy meters can detect pulses of much shorter duration and faster rise ...

UV, VIS, and IR LEDs are replacing traditional light sources and are enabling new applications. Ophir offers a number of choices in LED power measurement shown below for use with you Ophir Power ...

The ILT1000 takes advantage of readily available, cost effective, wireless devices and provides ISO/IEC 17025:2017 Accredited & NIST-traceable UV, VIS & IR light measurements.

The Smart Detector Head incorporates the features of a full-function optical power meter (except display) in a miniature housing. This makes it ideal for applications that require multiple detectors in a ...

HPL220IR infrared optical power meter is a wide spectral line infrared optical ...

Our benchtop optical power and energy meters are plug and play compatible with our wide range of calibrated optical sensors for the highly accurate and repeatable optical measurements required in ...

Choose the optical power meter you need to enable centralized control, flexible connectivity, and scalable measurement capability for optical component development or production test. Choose one ...

Thorlabs ... Thorlabs

Precision optical power meters for characterizing continuous and pulsed laser systems. Essential for R& D, laser manufacturing, and fiber optics.

HPL220IR infrared optical power meter is a wide spectral line infrared optical power meter, which is mainly used to measure the power density of infrared radiation, that is, the radiant energy power per ...

VIAVI has taken optical power meter technology into the next generation. Ruggedized, purpose-built power meters compliment all-in-one options with advanced feature sets and fiber inspection capabilities.

New product Infrared light integrated optical power meter
