

VIAVI provides the widest range of OTDR testing tools delivering everything from basic fiber certification to fully automated bidirectional OTDR testing that scales for multi-fiber cable certification.

Learn how OTDR testing works and compare ZION OTDR models to choose the best tester for FTTH, PON, ODN, and backbone networks. Complete guide with parameters, procedures, ...

iOLM is an OTDR-based application designed to simplify OTDR testing by eliminating the need to configure parameters and/or analyze and interpret multiple complex OTDR traces.

The award-winning SmartLoop OTDR enables automated testing and analysis of two fibers in a single test while meeting standards requirements. This patented process automatically separates the two ...

As opposed to the simple light source and power meter test method, the OTDR can identify and locate any potential faults, macrobends or breaks that could impact network performance.

The product can be used for a wide range of applications, from a high dynamic range model suitable for long distance measurement to a model with a wavelength of 1490 nm used for FTTH installation ...

Fluke Networks OptiFiber® Pro OTDR built for enterprise fiber optic cabling certification testing. It supports copper certification, fiber optic loss, OTDR testing and fiber end-face inspection.

Functions: For evaluating FTTx and access network construction and maintenance, identifying fiber breakpoints, measuring cable length, and calculating relative optical power losses. Built-In: 3.5 inch ...
