

Electrically variable attenuators are used to control optical power. It is generally used in a feedback scheme by incorporating an optical tap monitor in a fiber optical system to achieve precision power ...

These pigtail-style attenuators provide mode independent fixed attenuation when used with multi mode fibers. The insertion loss will not depend on how the light is launched into the fiber. This is a ...

They are passive devices used to reduce the strength of the optical signal, ensuring optimal performance and preventing signal distortion or damage. In this comprehensive guide to fiber optic ...

Our male-to-female buildout optical attenuation (Pads) are available across all fiber modes, featuring LC, LC/APC, SC, SC/APC, FC, FC/APC, and ST connector types. Our in-line attenuator is customized to ...

We make best-in-class optic/electro-optic products based on over 25 years of intensive R& D and rigorous engineering. We strive to provide premium product solutions with unmatched value.

These plug-style attenuators simply mount on one end of a fiber optic cable, allowing that cable to be plugged into the receiving equipment or panel. We also have female to female (bulkhead) ...

Select the optical attenuator you need to simulate real-world optical link conditions, calibrate power levels, or automate signal conditioning in your optical test setup based on maximum attenuation and ...

Shop DigiKey's large in-stock selection of Fiber Optic Attenuators. View inventory, pricing and order now for same day shipping!

DFA-632082 - Fiber Optic Attenuator from Fibertronics Inc.. Get product specifications, Download the Datasheet, Request a Quote and get pricing for DFA-632082 on GoPhotonics.

FS fixed and variable fiber optic attenuators with leading attenuating fibers guarantee consistent and stable fiber attenuation (0~60dB) in WDM transmission.
