

Based on the design of C-band receivers, we have developed compact optical receivers for the L-band operation. This paper presents the design and typical characteristics of the new optical receivers.

The L-Band fiber optic Transmitter/Receiver pair are used for transporting RF Satellite signals in the L Band over fiber from the antenna to the satellite receiver. L-band RF signals have a ...

Our Fiber Optic Receivers employ high linearity PIN photo-diodes that can handle optical power levels of up to 10mW. The standard receivers are integrated with LNA and are available in broadband ...

In this section, we discuss techniques to characterize optical receivers, with a focus on the wideband characterization of their frequency response.

Ideal for point to point transport, or for small (Level 1 only) scale LTTH distribution systems with 32 or less optical receivers. Supports ATSC feed from local off-air antenna 54-3000mHz.

It accepts an optical LC connector input on one end, and provides an electrical output on the other. The 2307LR attaches to the input of a device without any intermediate cabling required.

The design of an optical receiver depends on the modulation format used by the trans-mitter. Since most lightwave systems employ the binary intensity modulation, we focus in this chapter on digital optical ...

Finisar's 600G Coherent Photodetectors and Receivers offer exceptional performance for a variety of applications, including Communication, Test-Measurement, and R& D.

Standard receivers accept an optical input of +2 ~ -12 dBm This combination of transmitter and receiver will support distances of 40km (25 miles) Several LNB types require voltage and/or signaling. The ...

The coherent optical receiver (CORX) leverages a monolithic 45-nm CMOS SOI photonic-enabled process to realize an energy-efficient quadrature phase shift keying (QPSK) demodulation. Co ...

Advanced Receivers and Detectors balanced photodetectors (PDs) are based on advanced waveguide integrated photodiodes. The detectors are designed for wavelengths including 1310 nm and 1550 ...
