

Passive Optical Networking by Jiulian Technology

This article covers every aspect of passive optical LAN, including its definition, key components, merits and demerits, and the necessity of transitioning to such a network.

PON and beyond PON is more than just a technology--it's a smarter, faster, and greener way to build the networks that connect our world! Whether you're already familiar with PON or just ...

JiuLian Technology mainly adopts HISILICON's chips to package optical modules, and the bulk shipments include 25G, 40G, 100G, 200G, 400G and other rates of optical modules.

What Is Passive Optical Networking (PON)? Passive optical networking (PON), like active optical networking, uses fiber-optic cabling to provide Ethernet connectivity from a main data source to ...

This informative white paper covers what Passive Optical LAN is, how it works and why it benefits you, your company and the industry.

PONs are assembled from passive devices, such as optical fibers, connectors and power splitters, with active elements such as optical line termination (OLT) devices and optical network ...

This chapter begins by giving an overview of the evolution of optical access networks, focusing on Passive Optical Networks (PONs). The development of the different PON standards and ...

This paper presents a comprehensive overview of the emerging coherent passive optical network (CPON) technology and its role in the evolution of next-generation PON architectures.

Passive optical LAN is a GPON-based technology that creates a very cost-effective LAN with virtually unlimited capabilities. Following the FTTH trend to deliver more bandwidth to consumers, this new ...

On December 16, 2025, Guangdong Jiulian Technology Co., Ltd., as one of the ecosystem partners, signed a co-creation agreement for the "Gewu Industrial Internet Platform & Wanwu Industrial ...
