

Quotation for flame-retardant micro-modules

Micro1-EV Chemtronics CPU Module Fire Suppression System. Parts available for purchase or repair. Contact Powergenics with questions or a quote.

Our halogen-free Exolit(TM) flame retardants give reliable safety to switches, casings, micro-assemblies, printed circuits and many other E& E parts. Learn more!

The Fireye MicroM Flame Safeguard controls are compact, modular burner management systems designed to provide automatic ignition and continuous flame monitoring for commercial sized heating ...

All amplifiers are available with flame failure response times of 0.8 seconds or 3 seconds nominal (4 second maximum) and each provide a set of test jacks with a uniform range of 0-10 VDC for the ...

Aluminum Silicate Fiber modules are made of ceramic fiber needled blankets and processed on special machinery according to the module's structure and size. They are high temperature insulation ...

Often, to achieve the requisite degree of flame retardance for these cables, desired mechanical properties may have to be compromised for the cable construction.

2.1 FLAME SAFEGUARD CONTROL - The Burner Management Flame Safeguard Control shall be of a modular design, with the programmer and amplifier modules plugging into the chassis.

Certain current standards require a degree of flame retardancy for construction products, especially for indoor applications. Some of these standards extend to electrical and telecommunication...

It is a solid material with certain shape and size specifications made of expanded vermiculite and other fire-resistant materials, which can be easily cut and drilled, suitable for fire-resistant sealing of holes ...
