

Remote monitoring consultation for optical backplane connectors

As optical backplane connectors are often seated deep within a chassis or rack or on narrowly spaced cards, inspection and cleaning aspects of fiber optic interfaces are greatly aggravated due to ...

Utilizing the same external cable plugs for front panel and backplane applications, novel X, Y and Z floating mechanisms allow for generous mismatch between the card mounted and rack mounted ...

Our portfolio of backplane connectors features high-performance right angle, co-planar, and mezzanine interconnects, used for mating printed circuit boards together. TE engineers use sophisticated 3D ...

Open.Tech specializes in providing custom backplane assemblies with a focus on high-speed, high-density components that power them. Our expertise includes the design and manufacture of critical ...

SENKO" Optical Backplane connector with AirMT(TM) technology offers excellent optical performance and stability. Blind mating technology connects up to 144 fibers using 24F MT ferrules.

Samtec offers a variety of SureWare(TM) hardware for connector support, including precision standoffs, alignment hardware, and guidance modules to assist with mating/unmating and help ensure a ...

Optical test head equipment helps operators troubleshoot, audit and monitor optical fibers remotely. Learn more about OTH and EXFO"s remote fiber testing and ...

Our innovative solutions are based on both Physical Contact (PC) and Expanded Beam (EB) technologies to cover the various types of applications. Click on a category below to learn more ...

Optical test head equipment helps operators troubleshoot, audit and monitor optical fibers remotely. Learn more about OTH and EXFO"s remote fiber testing and monitoring (RFTM) system.

The Fiber Monitoring System is a comprehensive platform for managing and maintaining fiber optic networks, utilizing DGPS and Cable Fault Locator technologies for precise fault detection and ...

The Light CONEX ® optical backplane module connector consists of a connector shell and insert. The shell is designed to provide float for the insert in both the X- and Y-directions to enable alignment of ...
