

Self-organizing network aggregation switch

High-performance 10G SFP modules for optimal connectivity. An 8-port, Layer 2 switch made for 10G SFP+ connections.

Complete Business-Class Ecosystem - Festa Self-Organizing Network platform integrates network devices, including switches, access points & routers with consumer-inspired simplicity.

Built with a durable metal enclosure and advanced switching architecture, the Aggregation Switch supports multiple Gigabit and 10G SFP uplinks for flexible deployment. Managed models feature ...

Discover the role of aggregation switches. Explore differences between aggregation, access, and core switches, and choose the right model for your network.

These aggregation switches support advanced VLAN for flexible traffic segmentation, advanced QoS for prioritizing network traffic, IGMP/MLD Snooping for optimizing network performance, and ...

Power over Ethernet, Flexible Network Deployment Transmit both data and power via a single cable to other 802.3af PoE or 802.3at PoE+ devices, without the hassle and cost of installing power cabling. ...

Equipped with future-proof fiber-optic and multi-Gigabit Ethernet (mGbE) ports as well as high-throughput uplink and stacking ports, they form the basis for efficient and fail-safe networks. Stacking ...

Provides 1G, 2.5G, and 10G speeds for flexible customization, ensuring optimal performance, compatibility, and scalability. Flexible interface options like copper, fiber, and PoE ensure seamless ...

The expected growth of Gigabit and multigigabit services requires operators to architect network access scalability upfront. For this reason, we've delivered a data center-influenced standalone OLT ...

Combined with H3C AD Campus Platform, it can easily implement a two-layer network architecture and quickly add functions in existing network in order to drastically reduce network management ...

Self-organizing network aggregation switch
