

Steel straight ladder tray sections with 6" side rails, available in 6"-36" widths and 10"-24" lengths. Compliant with NEMA 12C, 20B, and 20C standards.

Cable tray installed in a hazardous location must contain only those cables that are appropriate for this type of environment as defined in Chapter 5 of the NEC.

Our cable tray design considerations guide details key factors to consider when designing cable tray systems for industrial and commercial applications. Browse or download the cable tray catalog for ...

The Ladder Tray features light, rugged, tubular steel construction. It is designed for mechanical support and strain relief in long runs of cable and creates a smooth gradual bend for cable. Rail and stringer ...

NEMA VE 1-2017 Specifies requirements for metal cable trays and associated fittings designed for use in accordance with the rules of Canadian Electrical Code, Part I and the National Electrical Code[®];

Description: This product category covers metal cable trays and metal cable tray systems intended for field assembly and for use in accordance with Article 392 of NFPA 70.

Formed side rails are welded to 15/8 in. wide rungs to provide maximum rigidity and strength. Rung design includes exclusive Ty-Rap cable tie slots on 1 in. centers.

2.1 Cable tray systems shall be of the design of one manufacturer and shall be designed so that there are no burrs, projections, or sharp edges to damage cable insulation.

Show fabrication and installation details of cable tray, including plans, elevations, and sections of components and attachments to other construction elements.

It should be noted that independent testing has been carried out to verify the structural performance of cable tray at the minimum and maximum temperature classifications for test conditions. They should ...
