

Swiss Modular Data Center Immersion Liquid Cooling Consulting

Munters provides scalable, energy-efficient liquid cooling systems for data centers, managing high-density heat loads and enhancing operational efficiency.

Your partner for integrated liquid cooling infrastructures. Discover direct-to-chip and immersion cooling for high-performance computing and data centers.

It has been scaling up its offerings for some time, with its two-phase immersion cooling solution having been the recipient of multiple awards for building the world's most efficient liquid ...

GRC's patented immersion cooling technology simplifies deployment of data center cooling infrastructure eliminating the need for conventional cooling components and reducing data center design, build, ...

Learn about the future of data center cooling and how liquid cooling solutions support high-density computing and enhance performance and energy efficiency. Explore our solutions now!

Company specializing in immersion liquid cooling solutions for data centers. We create liquid-cooled datacenters that scale smarter, run cleaner and cost less.

GREENTECH specializes in modular data centers that employ advanced cooling technologies such as immersion cooling and heat recovery. Their innovative approach not only enhances energy ...

Award-winning single-phase immersion cooling for datacentres. Natural convection technology for high-density CPU and GPU. Delivering sustainability, high performance and reliability for your datacentre.

DCX's Immersion Modular Datacenter immerses servers in a dielectric fluid, delivering direct heat absorption and drastically reducing cooling overhead. This fully sealed, compact solution is easy to ...

DataTank Modular represents the most advanced technology in pre-fabricated, 2-phase immersion-cooled data centers. Offering massive compute scale in the most compact form factor, DataTank ...
