

# Technical Support for High-Density Micro-Module Data Center

FS offers technical support for both pre-sales and post-sales. Our local technical team provides installation services that save time within one week and reduce costs by 30-40%.

High-density data halls supporting 250 kW per rack standard and up to 500 kW with modifications, with up to 8 MW per module and factory-built reliability.

Delta's modular datacenter solution offers a datacenter environment that provides safe equipment operations within the racks, and supports the development and standardizing of micro datacenters ...

Our experts will design a pre-engineered data center tailored to your capacity, cooling, and scalability needs -- delivered with clear specs, timelines, and costs.

Compared with earlier transceiver form factors, the OSFP standard provides enhanced scalability and better support for future high-speed technologies. With growing demand for faster data processing ...

It supports up to 40+ high-density racks per pod with hybrid liquid-air cooling. Preconfigured and factory-tested, it ensures predictable performance, reduced capital expenditure, and rapid time-to-market ...

With the Vertiv MegaMod HDX available in both compact and combo solution configurations, organizations can match their facility requirements while supporting high-density, ...

According to the latest research by Omdia, demand for prefabricated modular and micro data center solutions has been accelerated by AI, with Vertiv being cited as a global leader.

Organizations are increasingly moving to intelligent data center solutions that deliver the agility, reliability, and efficiency that support the rapid service deployment needed to compete and win in this ...

Whether you're a data center operator seeking an expert partner to deploy and maintain AI/HPC infrastructure, or a manufacturer needing a certified installer and service provider for your ...
