

# Unable to configure gateway on fiber optic switch

Hi Folks- My ISP (Optimum) recently upgraded my house to Fiber lines. The "Altice" modem/router combo cannot be bridged, according to Optimum tech...

Check whether all the required ports of the gateway are enabled if there is an NAT (Network Address Translation) device between the gateway and the Controller. And check if there is ...

Here's how to configure IP passthrough settings to use the Internet Gateway with other networking equipment (router, switch, etc.).

Simply unplugging and then plugging back in your gateway can solve connectivity issues, increase network security and maintain performance. Just follow these steps: If you're having issues and ...

If your home phone service is provided through our fiber optic network, it needs electrical power to operate. Your gateway does not contain a battery backup so you should make sure you have one to ...

This document describes how to troubleshoot fiber optic interfaces by addressing some of the fiber optic module and cabling specifications.

Hello @YoandryG! Thank you for reaching out on our community forum. This link explains how to set up bridgemode on your Xfinity gateway. As for a pass through option, I don't see ...

How to install and set up Gateway Fiber; Set up your UXG-Fiber for the first time.

Technically you can, but in almost every case I've never seen a residential ISP allow that. They always want their fiber box in the mix.

The fundamental problem is: AT& T does not allow you to remove their residential gateway, even if you'd prefer to use something better. You must use AT& T's provided residential gateway, ...
