order to elevate their importance in infrastructure funding as a shared regional responsibility.

A corridor can be defined as a linear geographic area with one or more modes of transportation that facilitates the movement of people and goods, supports the economy, and connects communities.

We define a Corridor as a set of bridges that works together to deliver a transportation service. Intuitively, a Corridor is a segment of an important road or a highway.

Wildlife crossings are human-built infrastructure, like bridges or tunnels, designed to help wildlife safely cross roads. Crossings reconnect habitat (including corridors) that has been (or will be) bisected and ...
