

Which side to cut in the cable tray

Cut cable tray wires with side-action bolt cutters with offset head to ensure integrity of protective galvanic layer. Remove burrs and sharp edges from cable trays.

Always use side action angle bolt cutters. Angle all cuts away from the new end. Cut each wire with one clean cut - eliminating any grinding or touch-up. Cut the bottom wires first, in order as shown, from ...

Always use side-action bolt cutters. Angle all cuts away from the new end. Cut each wire with one clean cut whenever possible. Remove any sharp edges to eliminate possible damage to cables.

Only cut the bottom and the inside side of the tray. To remove a 2? row, cut the longitudinal wires between two transverse wires, on the bottom and inside of the bend.

The electricians want to "notch" the cable tray side rail so wireways can be attached to it and transition the cabling into it. They'd remove approximately 12" of the rail at several locations ...

Refer to the images below to determine how many tray sections will be required to be cut from the tray for the corner splice. Ensure that the side wire cuts and the mid-section cuts are always symmetric.

When cutting Side Wires, rest the side of the wire shears against the side of the vertical wire you are going to leave. Place the jaws around the wire you are wanting to remove. Cut at an angle away from ...

Developed by Interstates, this cable tray cutting guide acts as a guide for a metal cutting circular saw for cutting the side rail of a cable tray as well as a guide for drilling...

Where products have to be cut at irregular distances, we recommend having the open cut end placed inside where possible (I.e. open ends of support inside the starter bracket, open ends for ladders and ...

Washer Splice Kit The most universal splice kit option, it can be used with all tray sizes and in all locations (side and bottom).

For ladder or ventilated trough trays, the total sum of the cross-sectional areas of all the cables to be installed in the cable tray must be equal to or less than the allowable cable area for the tray width, as ...

Bend side wires on both sides of the tray and reassemble using adjustable clamps to attach side rail edge and universal splices to attach tray bottoms. To form a horizontal cross, proceed in the same ...
