

It specializes in the production of transmission and distribution products such as complete sets of high and low voltage switchgear, capacitor compensation cabinets, various power control distribution ...

With a simple structure, clear labeling, and easy access, the distribution box ensures safe operation, quick maintenance, and reliable protection for low-voltage electrical systems.

XM series integrated distribution box/cabinet is suitable for AC frequency 50Hz, rated voltage 220V or 400V single-phase or three-phase five-wire lighting and small power lines, it is used to control, ...

XM Cabinet is widely used in lighting distribution systems of power station, transformer station, factory, mine, hotels, apartment, buildings, port, railway station, airport, warehouse, hotels etc.

It is primarily used for controlling and distributing power to electrical equipment, providing protection against overloads, short circuits, leakage currents, and overvoltages. This distribution box is ...

Ensure a safe and reliable electricity supply for your home or office with this premium electrical distribution board. Features multiple circuit breakers, a sturdy lockable metal enclosure, and color ...

The XM series distribution box is a versatile, reliable, and safety-focused solution for modern power distribution needs. Its robust design, modularity, and compliance with international standards make it ...

XM distribution box is suitable for the power supply and distribution system with frequency of 50/60Hz and rated operating voltage of 380V/220V. It is used for the power distribution of power lighting and ...

XM1 ~ 2 series are economical switch distribution boxes, which can be installed with various miniature circuit breakers with modulus of 18mm and 86 type sockets.

XM series indoor lighting distribution box is designed for AC 50Hz, 220V or 380V terminal circuits with rated current $\leq 100A$. It provides comprehensive protection against electric leakage, short circuit, and ...
