

YTC702 Microcomputer Relay Protection Tester

The HUATAI Microcomputer Relay Protection Tester HTZ-702 is designed to assess the performance of relay protection devices used in electrical systems. It ensures that protective relays function ...

The tester can not only test traditional relays and protective devices, but also test ...

The YD702A Microcomputer Relay Protection Tester by Wuhan Yidian is designed to conduct thorough testing and analysis of relay protection systems used in power networks.

We believe that our Three Phase Secondary Injection Protection Relay Test Set can compete with any other similar products in terms of quality performance as well as price. Our tester is powerful in ...

Microcomputer relay protection tester is composed of high-integration, bus-out chip single-chip microcomputer, high-precision current and voltage transformers, high-insulation-strength ...

Can test a variety of relays and microcomputer protectors and simulate complex transient, permanent, conversion of failures to test. Boot to use, easy to operate.

The tester can not only test traditional relays and protective devices, but also test modern microcomputer-based protective devices, especially the differential protection of transformers and ...

Microcomputer relay protection tester with a large screen LCD display and flexible and convenient rotating mouse controller. Stand-alone operation has a strong function, can carry out most of the ...

For testing high-voltage microcomputer protection devices, it is recommended to use a microcomputer relay protection tester capable of simultaneously outputting three-phase voltage and three-phase ...

Relay protection microcomputer test device plays a key role in operating electricity power systems reliably and safely. It is the testing device used in professional ...

Relay protection microcomputer test device plays a key role in operating electricity power systems reliably and safely. It is the testing device used in professional field of microcomputer protection, ...

The three-phase microcomputer relay protection tester is an intelligent device used in the power system field to test the performance of relay protection devices.

YTC702 Microcomputer Relay Protection Tester
